Professional Summary

Proficient web developer, audio engineer, and educator with proven track record of success. Lifelong learner who has most recently graduated from the Coding Boot Camp at UT Austin. Dedicated to maintaining a strong work ethic in a collaborative, efficient, and positive manner.

Work Experience

Fusion Academy

2018 - present

Music Teacher and Mentor; design and implement specific curriculum to match students' learning styles grades 6th – 12th. Subjects include Guitar, Drums, Recording Arts, and Music Theory using Fusion Academy's one-to-one education method. Additional critical skills include demonstrating patience, mentorship, and commitment in a learning environment on a daily basis.

Apple Inc.

2015 - 2018

Apple Developer Program Support/App Review Advisor; provide administrative-level and occasional technical support with strong customer service skills for Apple Developers. Perform system troubleshooting and data collection to further investigate developer issues and answer questions. Use of sound judgment and critical thinking to assist with getting developer apps live on App Store.

Education

Projects

The Best Employee Directory (BED) – Web app where user can access and sort employee contact info

- **Built with:** React, Axios, Bootstrap, and Random User API
- **Achievements:** Developed dynamic components for UI, use of Random User API, employee table sorting by name, managed component state, and successful Heroku deployment
- **Challenges:** The ability to search for employees is still a work in progress

sssSnake! – My personal take on the classic arcade game

- **Built with:** JavaScript, p5.js, HTML, CSS, and Logic Pro X
- **Achievements:** Custom score keeper, music, sound effects, and element styling
- **Challenges:** Effectively implementing p5.js for cross-browser compatibility
